

Lab 02 — Azure RBAC Evidence

Azure Resource Group Access Control (IAM)

Objective: Demonstrate role-based access control by assigning the Reader role to a lab user at the resource-group scope.

Evidence #1 — Reader RBAC Assignment

The Azure Access control (IAM) page shows **labuser01** assigned the **Reader** role. The scope is **This resource** for the lab resource group **rg-security-lab**.

Result: RBAC Reader assignment successfully created and verified in Azure.
