

Azure Cloud Security Labs

Lab 5 & Lab 6 — Evidence Package

Microsoft Azure Storage Security, Data Protection, Blob Versioning & Recovery

Lab	Evidence captured
Lab 5	Blob/container soft delete and blob versioning configuration; secure-data container and blob upload workflow.
Lab 6	Blob version preserved through versioning and successfully promoted back to the active/current blob.

Evidence compiled from the Azure Portal screenshots provided during the lab.

Lab 5 — Azure Storage Data Protection

Evidence of Azure Storage blob protection configuration. Blob soft delete and container soft delete are enabled for 7 days, and blob versioning is enabled.

Evidence 1 of 5 — Azure Portal screenshot.

Lab 5 — Secure Data Container / Blob Upload

Evidence of the secure-data container and the upload workflow for security-test.txt.

Evidence 2 of 5 — Azure Portal screenshot.

Lab 6 — Blob Versioning Evidence

The Versions view shows the preserved version of security-test.txt, including the version ID, modified time, Hot access tier, Block blob type, and 383 B size.

Evidence 3 of 5 — Azure Portal screenshot.

Lab 6 — Restored Active Blob

Final verification after making the preserved version current. security-test.txt is visible as an active Block blob in the secure-data container.

Evidence 4 of 5 — Azure Portal screenshot.

Lab 6 — Pre-Recovery Blob State

Earlier container state showing security-test.txt present before the recovery workflow was completed.

Evidence 5 of 5 — Azure Portal screenshot.
